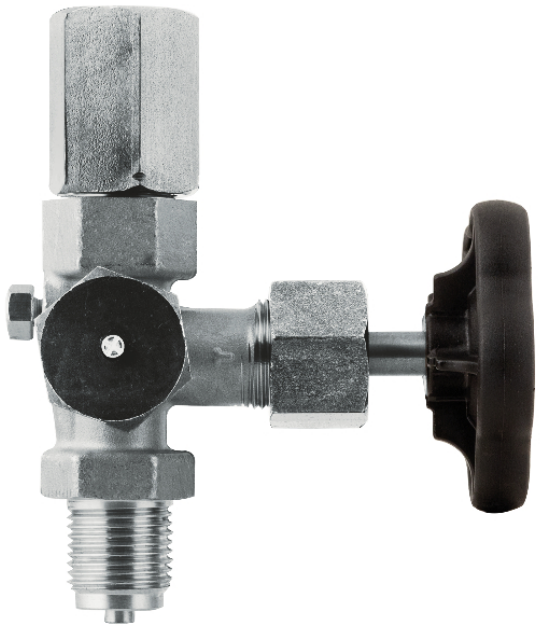
pressure gauge shut-off valve

Part no. 63044

pressure gauge shut-off valves



Application

Shut-off or reducing element between pipe and pressure gauge. Stop valves with test port allow you to connect both pressure gauges and testers to the measuring line. Suitable for liquids, gases and vapour.

Technical Specifications

Version
DIN 16271 with male test port M 20 x 1.5
Type A female/female connection x male

Operating temperature range
Stainless steel 316 Ti
-20/+200 °C

Connection
see ordering table

Nominal pressure
PN 400

Housing
Stainless steel 316 Ti
