

air quality / CO_2 CAPBs® sens AQ 35

Part no. M090230010

CO_2, humidity and temperature determination

Description

CAPBs® CO 2 determination AQ 35

Sensor module for detection of carbon dioxide in ambient air. The integrated, highly accurate CO 2 infrared sensor be adjusted in fresh air. Thanks to the possibility to conveniently enter the measuring time, it is possible to easily check and document given CO 2 mean values. Meets the requirements of EN 50543 concerning measurement of CO 2 in indoor air.

CAPBs® determination of CO 2, humidity and temperature AQ 36

Multi-sensor module for detection of carbon dioxide in ambient air and measurement of humidity and temperature. The integrated, highly accurate CO 2 infrared sensor be adjusted in fresh air. Thanks to the possibility to conveniently enter the measuring time, it is possible to easily check and document given CO 2 mean values. Meets the requirements of EN 50543 concerning measurement of CO 2 in indoor air.

Technical Specifications

Dimensions
W x H x D: 42 x 83 x 35 mm

Weight
50 g

Measuring range
CO_2: 0/10000 ppm

Accuracy
CO_2: ± 3 % of meas. value + 70 ppm (400–5,000 ppm)

Resolution
CO_2: 1 ppm
