- Suitable for AFRISOhome Gateway HG 02

Application

For extension of the AFRISOhome Gateways HG 02. It allows for integration of sensors and actuators with ZigBee wireless technology into the AFRISO smart home system. Visit the Download Centre for a whitelist of all compatible devices.

Description

Wireless cube as extension module for the AFRISOhome Gateways HG 02. The extension module can be plugged directly into one of the three free slots and is immediately ready for use. The free AFRISOhome app for iOS and Android integrates the sensors and the actuators of the extended wireless standard. Smart home systems based on an AFRISOhome gateway excel with virtually unlimited customisability and extensibility.
