

pressure gauge dual stop valve

Part no. 63116

pressure gauge shut-off valves

Application

Shut-off or reducing element between pipe and pressure gauge. Stop valves with test port allow you to connect both pressure gauges and testers to the measuring line. Suitable for liquids, gases and vapour.

Technical Specifications

Version
DIN 16272 with male test port M20 x 1.5, can be shut off separately
Type B loose female coupling x male connector and shaft for instrument bracket

Operating temperature range
Steel
-10/+120 °C

Connection
see ordering table

Nominal pressure
PN 400

Housing
Steel
